## Your Rights to This Report

First off, I want to say you may do as you wish with this report. My recommendations would be to read it then read it again until you fully understand the concepts revealed herein...

This report may be given away on any website as long as you leave all links intact, and information unchanged. Use this report as incentive to build your opt-in list or any other way you see fit...

Fair enough?

Great!

Now let's get it on...

## Attention!

Let me just start off by saying that what you have in your hands right now is an amazing traffic creation system.

You will learn exactly how to get massive swarms of visitors to your website or direct them straight through your affiliate links.

What you are about to read, hear, and see is undeniable truth of how one affiliate uses just this one amazing technique alone that consistently generates \$100 - \$150 / day.

And that is...

A no-fluff FULL **step-by-step** guide to earning money through affiliate marketing with huge amounts of traffic driven through your affiliate links.

I'm talking about completely FREE laser-targeted traffic that will keep coming months, maybe years after you set this technique in motion.

And the best thing...

This doesn't require any specialized skill, hours of trying to beat the search engine puzzle, or any other technical blah blah blahs.

This is just one out of several techniques that I use to generate amazing amounts of sales through my affiliate links that have my website traffic meter going crazy in just **36-48 hours**.

Let me tell you something straight off the bat...

This technique is not some miracle; it's not a product of fairy godmothers, or a wish from a genie. This is a product of your willingness to learn and put into action right away what you learn...

You do not need any of the following:

- ☐ Hundreds of dollars to spend on PPC
- ☐ Specialized technical skills
- ☐ OR even a Website!

Now this does take some effort and mental thought.

Any system that does not require you do at least a little work simply **WILL NOT WORK**.

I mean it. Once you put this strategy into motion you will not be able to undo the massive amounts of traffic from interested people waiting to spend loads of money that goes directly into your pocket.

I'm talking about a strategy so powerful that once mastered no one - even the search engines can take it away. See...

When you keep getting better, and honing this amazing skill. The possibilities are absolutely limitless...

**“So wait a minute, Bryan... If this system is so powerful like you say it is then why are you giving it away completely FREE of charge?”**

Let me tell you why...

I was just like most people starting out trying to make money on the Internet. I was susceptible to the blatant lies of these so call "Internet marketers" who were making thousands every month.

I bought the \$47 dollar ebook, I bought the \$97 ebook, I bought the \$300 dollar ebook.

And guess what...

They didn't help me make one red cent using the Internet.

There's something gurus don't tell you, and one thing is there is a learning curve that every successful person must go through before they can really start generating money through the Internet.

No... They want you to believe that you can go out and buy this ebook, that ebook and the other and you'll be making a thousand dollars by tomorrow.

It's simply not true.

I am not going to lie to you. In fact, I've never been a good liar - my mother always saw right through me. So I could tell you by tomorrow you'll be making \$100/day. But it's simply not true.

Anything worth getting is worth working for...

But what's good for you?

I can cut that learning curve in half. I can get you going on the right path; I can tell you exactly what to do, but the other half is up to you. I can only tell you so much, because I only know so much. But what I do know, WORKS!

These are the exact steps I take to find a niche market and still make money, no matter what the competition. Then I teach you where to find products to sell in the same niche market. Then comes one amazing technique that I use to drive thousands of unique hits to my affiliate websites everyday, all for free.

**"So why is it free again?"**

I'm tired of people being lied to and practically robbed of their hard-earned money just because some jerk that has probably never made a dime himself on the Internet wants to take others for a fool.

Reason two...

I've spent so much money on empty promises, and the ironic thing is that the information that really helped me to start making a profit on the Internet was absolutely free.

The secret is out...

You do not have to buy anything to learn how to make money on the Internet.

Now there are always exceptions to the rule. There are some people who really have your best interest at heart, like:

1. Mike Filsaime's : [The Butterfly Marketing Manuscript](#)

This is a great resource of knowledge, which if you ever get a chance you should definitely look into.

***OK ENOUGH WITH THE TALKING!!!***

That's exactly how I feel too. So let's start you on your journey to a real way to make real money on the Internet.

Ready?

Great!

Let's go...

**The Basics First...**

If you are new to affiliate marketing and have never used PPC before, you may not have known but Google has really put it to us marketers with the recent raise in pay per click price.

People have literally lost hundreds over night with the recent spike in click prices, and it doesn't seem to be dropping anytime soon.

What's the alternative?

Free traffic. Perhaps Google's recent price spike was for the best, otherwise neither you nor I would have figured out how exactly to get targeted visitors to our affiliate sites without paying one cent for advertising.

And what is the easiest way to do this...

**Acquiring inbound links from well-established sites.**

Now there are a couple of ways to do this:

- ❑ Paying for links - too expensive!
- ❑ Reciprocal links - good, but you cannot always get to larger sites.

What you need is one way links from large sites to your website. This can be quite difficult to achieve. Webmasters are not always willing to just slap a link up to your site free of charge, with nothing in return.

So how do you do it?

How do you get hundreds possibly thousands of inbound links to your site?

Note: When I say site, I do not necessarily mean a site that you own. That is my primary thought when writing this, but you can just as easily apply these techniques to link directly to your affiliate's site. Okay?

Okay.

Drumroll please...

**What I'm referring to is called Article Marketing.**

BUT!

I am going to show you a very different and amazing way to do this. A way those gurus don't want you to know about.

Gurus tell you to write articles, which creates inbound links to your site, which makes your PR higher (Google's page importance ranking system). Then your article might get picked up by a webmaster and displayed on other sites.

Which is all true... BUT!

I am the type that wants to make money now and then enjoy the benefits later... I think you may feel the same way.

Before we continue any further on this path I want to explain some basics of article marketing to some of you newcomers. More experienced marketers may want to skip ahead in the text.

### **Quick Introduction to Article Marketing...**

Thousands of Internet Marketers are taking advantage of article writing as a way to drive free traffic to their website or a website that they are affiliated with.

Article writing is one of the easiest techniques to get listings on Google, Yahoo, and other search engines. You then submit these articles to article directories and then wait.

By submitting these articles to these directories, you then adopt their search engine rankings. This could take months or upwards to a year if you tried to optimize a website for search engines.

If you write an article and submit it to a popular website such as ezinearticles.com, your article will stay on that domain and therefore inherit the popularity of that site.

See...

Article marketing helps you leverage the power of the large sites to get a top listing for certain keywords.

Okay so there are the bare basics of article marketing. Now what sets this free report apart from the rest of these people pretending to know how to use article marketing to it's full potential is that I tell you exactly what keywords to target that will virtually guarantee your article to be on the first page of Google.

## Article Marketing the Smart Way

1<sup>st</sup> secret... Google absolutely loves a couple of sites

So...

Google absolutely loves three article directories in particular:

<http://ezinearticles.com> - <http://goarticles.com> - and -  
<http://searchwarp.com>

Google loves one classified ads site too, which is <http://usfreeads.com>. What's good about this site is that you only have to write a paragraph instead of a whole article. Your ad can still achieve first page rankings if optimized correctly. Imagine how powerful it would be to have your ad on the first page of Google every time you write one.

And I'll tell you exactly how to do that, but first...

I want to give you a couple more sites that Google loves...

- ❑ ArticleDashboard.com
- ❑ ArticleCity.com
- ❑ EasyArticles.com
- ❑ Amazines.com
- ❑ ValuableContent.com
- ❑ ArticleBase.com

Also EXTREMELY powerful sites are Wordpress.com, Blogger.com, and Squidoo.com. They are absolutely FREE... and anyone can get started with NO CASH!

2<sup>nd</sup> Secret... How to get on Google's first page 90% of the time...

This part will require a little bit of work, but nothing too strenuous, and there are programs that kick this part into turbo speed that I will tell you about later...

Okay... so the first secret is to post your articles or ads to one of the sites above.

But first you have to know how to target a phrase that you can easily dominate in search engines.

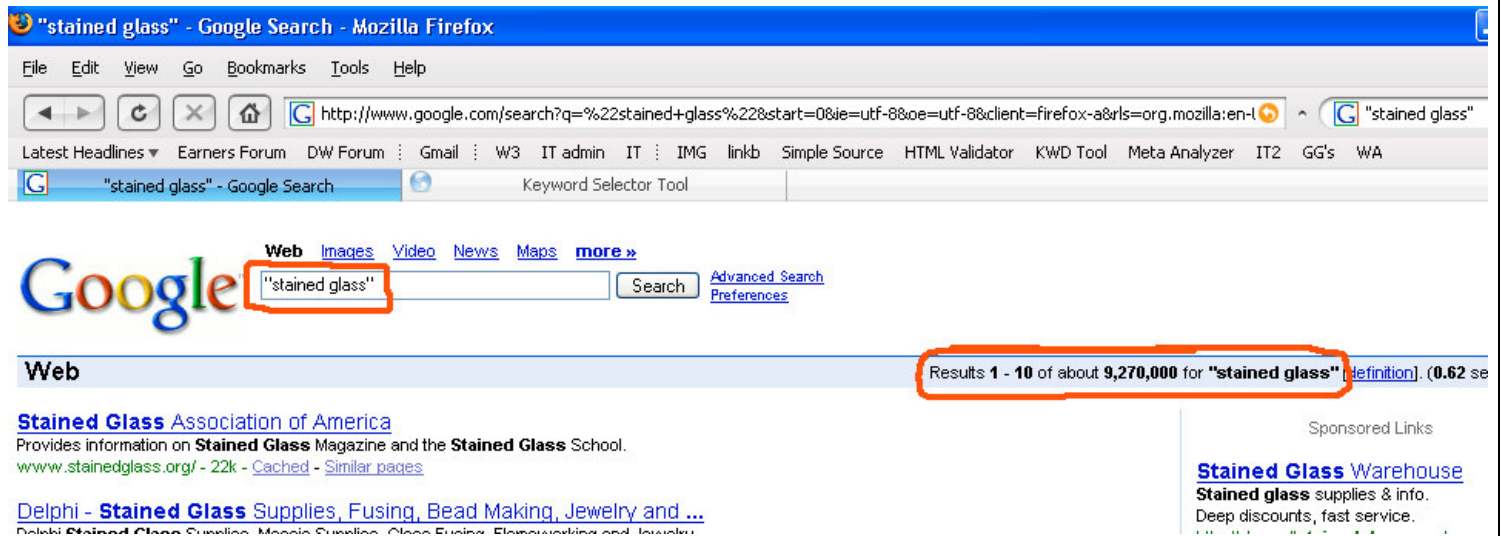

What you want to do is target a keyword phrase that has 1,000 to 5,000 optimized results.

What are optimized results? Well how about I just show you...

Let's take for example the phrase:

"Stained Glass" - so you type the words "stained glass" into Google with the quotes.

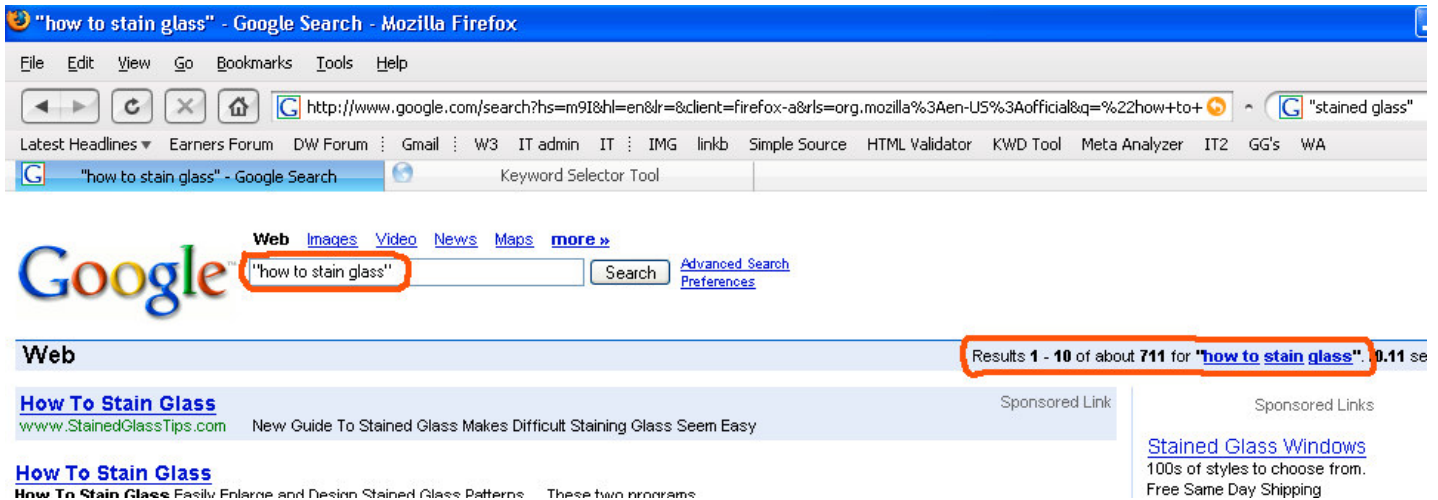

Above are the results of our optimized phrase search.

Okay... that's over 9 million results, which is way too many. (Normally no one would tell you this because they don't want you to know the REAL secret to article marketing). They want you to write article after article, but your article is hardly ever being seen.

You may be getting backlinks, maybe... but you are not making any money right now.

So let's take a gander at another example:

"How to stain glass"

Only 711 optimized results... Now that's more like it!

I guarantee that if you write an article targeting and optimizing for the keyword phrase "how to stain glass" you will make it on the first page of Google in 2 days to 2 weeks, depending on where you post it to, and all for FREE.

Now you might be saying... "Of course you can get on Google for "how to stain glass" but no one searches with quotes"

It doesn't matter. Your article will still show on the first page of Google without the quotes. But you need the quotes for research and research purposes only.

Okay... so far I've told you "the what" about finding these keywords, but now it's time for the how.

Note: Most ebook publishers would leave it at just that. They show you these amazing results - "the what" - but they don't tell you how to find these holes in a niche markets. Well, I'm not that type, so let's continue...

### 3<sup>rd</sup> Secret... Finding keyword holes in Niche Markets...

Now what I am going to go through is something that is so powerful and is the crux of this system. If you've been skimming shame on you, but this you will need to read and re-read until it all sinks in. It takes a fair amount of time

using free tools such as Overture and the like, but later I will let you in on a piece of software that does everything I'm about to tell you in the click of a button.

So...

Finding keyword holes in niche markets is not difficult whatsoever. The difficult part is thinking of niche markets to do your keyword research on.

Most newcomers for one reason or another flock to these "get rich quick" schemes to promote. The fact is that this market is so competitive that a newbie will not have much of a chance of making a sustainable income doing this.

That being said... It is not impossible to find these keyword holes even in the "make money" niche market, using the techniques I am going to show you. I have gotten emails from a couple of happy campers that have found these keyword holes and were benefiting greatly.

On another note, there is an ingenious way to find niche markets without having to think of them yourself. You let the millions of Internet users do the thinking for you. This can be achieved by using the software I spoke about earlier in a special way.

But for now I am just going to stick to the most common way a beginner would find these niche markets.

Here are some things you do to give you some ideas:

- ❑ Visit forums and see what people are talking about. If the majority is asking a question and have no real solution, that may be a niche market that you can fill.
- ❑ Think about what's hot right now. Obviously in this technological age, mp3 players, PSP, iPod, Microsoft Zune... The list goes on and on.
- ❑ New product names... This can be a huge advantage if you can get in on a new product name. Consider when Microsoft Zune was first surfacing, if you had written an article with those keywords in it. But the key to this is not to get a product that is huge like the Zune, but to get a product that will be huge eventually after word of mouth gets around. This works best with digital products that you can find on [clickbank.com](http://clickbank.com) and [cbengine.com](http://cbengine.com).

Okay... so let's get to the actual research.

As a keyword I thought that a relatively low competition niche that potentially has a sizable search volume is the keyword phrase: "Tie Dye"

So let's go on...

## Step 1

So you want to target a keyword phrase that has 1,000 to 5,000 optimized results. Just like the example above - “stained glass” has over 9 million results - but “how to stain glass” has only 711 results.

So what you want to do is go to <http://inventory.overture.com>. This tool gives you the exact amount of searches a keyword has received in the last calendar month.

Let’s look at our example of “tie dye”:

So the results look something like this →

The column in red represents the total amount of searches for the last 30-day calendar month. The blue column represents the exact keyword or keyword phrase searched for.

## Step 2

So what I do now is find which keywords if any can be profitable. So what we do is go back to Google and do the exact same process as we did before with the “how to stain glass” example. Only this time you will be putting in one of the key word phrases to the right.

Additional note: I like to stick around 1000 searches for the keyword phrases to make sure I get sufficient traffic. If you can find keyword holes that get more than 1000 searches / month, great! But I don’t like to go much below the 1000 search mark.

So I look and I see the keyword phrase “tie dye t shirt” and it has 1777 searches last month... Just from experience I know this keyword phrase is going to be too broad and have too many optimized results for our purposes. But I will show you just for visualization’s sake.

Get suggestions for: (may take up to 30 seconds)

tie%20dye

**Fantastic Tie Dye Tees**

Above are the optimized Google results for the keyword phrase: "tie dye t shirt"

As I suspected there are 122,000 optimized results, which is way too many for us to be competitive. So this keyword phrase is out of the question.

But this search was not a complete waste of time. If you look on the right side you can see that there are ads for that particular keyword, meaning there is money being spent and money to be made. Which is our overall goal.

So now what we do is go back to Overture results above. (You can scroll back up and look too)... Now what I see is the keyword phrase "tie dye instructions" has 934 searches / month. Now, 934 is a little lower than the 1000 mark but I think we can still work with this number.

Next we go to Google and do an optimized results search for the keyword phrase: "tie dye instructions"... The results are shown below.

"tie dye instructions" - Google Search - Mozilla Firefox

File Edit View Go Bookmarks Tools Help

http://www.google.com/search?hl=en&lr=&client=firefox-a&rls=org.mozilla%3Aen-US%3Aofficial&q=%22tie+dye+instructions%22

And Et Viola! There our only 568 optimized results... Now we can EASILY dominate a keyword phrase that gets almost 1000 searches / month, and money is being spent.

Now we're in good shape... wouldn't you agree?

**\*\*THIS IS VERY IMPORTANT\*\***

In order to determine the approximate position you will be placed on Google, you need to determine the current #1 position's page rank. You can do this by going to [prchecker.info](http://prchecker.info), and putting their url in the PR check toolbar. This will return to you that information. If the article directory that you are posting too has a higher PR than the top position url, most likely you will be placed as the #1 result.

\*\*\*\*\*

Are you getting excited yet? Are you starting to see the potential of this amazing system? I hope so, but we've still got a ways to go yet...

It's time for a...

Status Check:

- ❑ We've gone through some ways to find some niche markets to start our keyword research.
- ❑ We've figured out which keyword phrases to target and which not to target in our niche market

So...

Now I want to go over a way that you can basically cut half an hour to an hour of research down to about 5 minutes.

5 minutes?

Yes, I say five minutes.

This is software that I use on a daily basis, which has streamlined and turbo charged the research phase. It is called Click Ad Equalizer.

If you click the image above you will be taken to Click Ad Equalizer's home page where you can find out more about the software.

From one affiliate marketer to another, if you're at all serious about making good money, you need to invest in this program.

If you decide to buy the product through this <http://www.cashlessmarketer.com/recommends/clickadequalizer.php> link or the image above I will personally send you an additional free report on how I use Click Ad Equalizer, which boosts my sales by 300%.

So once again...

Status Check:

- ☐ We've gone through some ways to find some niche markets to start our keyword research.
- ☐ We've figured out which keyword phrases to target and which not to target in our niche market.
- ☐ We've found out how I streamline the research process and increased my affiliate sales by 300%.

So let's go on...

### How We Can Make Money with Our Results...

You may be asking yourself now: "How do I make money from all of this?"

Easy...

You need to find an affiliate program for the particular product and keyword phrase for which you are going to write your article.

The absolute best way I've found to do this is by doing a specialized search in all of the top search engines. The most common searches I do are in the same format as below. So let's use our example of "Tie Dye"...

Note: You do not have to use your optimized result phrase "tie dye instructions", as you are just looking for an affiliate program, and are not trying to size up your competition. So the searches go as follows:

"tie dye" +affiliate  
"tie dye" +clickbank  
"tie dye" +commission junction  
"tie dye" +linkshare

These searches will return many opportunities for affiliate programs and links, which we will use later in our articles. This is great for beginners, as all of these programs are free and easy to join.

So now you've got your optimized keyword phrase, you know there's money to be made, and you know which programs to promote that will make you the most money...

Its time to switch phases from the research aspect to the real action... So let's go through some article basics...

### Article Writing Basics...

I am going to tell you the simple way to write an article. You can do this even if you're are not a very good writer. Remember... the more you practice, the better you will get. On the same token, more practice equals more articles, which equals more money. It's a win/win situation.

Remember... K.I.S.S. = "Keep It Simple, Stupid"

Intro: Tell them what you are going to tell them

Body: Tell them

Conclusion: Tell them what you told them

Pretty easy huh...

In the bio box you want to write a sentence about yourself, then lead into your promotion.

For example:

“Bryan McConnahea is a successful affiliate marketer who regularly makes a healthy living from the Internet. Did you find those tips on XXXX helpful? You can learn a lot more about XXXX at [www.yoursite.com](http://www.yoursite.com)”

If you are giving something away for free be sure to mention that in your bio.

Get it? Got it? Good!

### Additional Article Writing Tips...

You do not have to be world-renowned author to be successful at article marketing. Remember... K.I.S.S.

Tips - People love tips, they perceive it as an easy and quick read, and are more like to check your article out. For example, 5 tips... 10 easy tips... etc. These are so simple to write.

FAQs - (frequently asked questions) are so easy to write. Just find 3 to 5 questions that people are asking and answer them... Again, an easy read for the visitor and they eat these articles up!

Reviews - Have you bought a great piece of software, or read a great book lately? People always love an honest opinion and are more likely to purchase a product if others have had success with it.

Okay... Now you've got some simple article tips, but the most important tip I can give you is to throw some personality into your articles.

What I mean by this is people get bored with long articles of just fact after fact after fact and no fun.

Take this example into consideration. Say you're writing an article on the best spyware programs on the Internet.

Here's the boring article excerpt:

“What is the best way to get rid of spyware on your home computer?  
□ You need to find a good spyware program that you can use...”

Here's a more exciting and readable approach:

“How you can tell Spyware to take it's job and SHOVE IT!  
□ You need a kick butt spyware program that will have even the most malicious spyware cowering in the corner, praying for your program to spare it's life...”

You see how the second excerpt incites emotion in the reader, gets them pumped up, and in an attitude that you can tell them how spyware doesn't stand a chance on their PC?

When you get to a level where you can do that on a consistent basis, you will find that your articles have more people clicking through to your website or to your affiliate's website.

Guess what that means for you... Mo' money, mo' money!

Okay... Moving along now... Besides basic writing skills there is another, and probably the most important aspect of writing your article...

### Optimizing and SEO'ing Your Article to Get that Top Listing on Google...

Remember our optimized keyword phrase: "tie dye instructions"... Well that comes into play now. Here is a simple guideline making sure your articles are optimized for the search engine. And don't worry this is not some long, drawn out process. It is very simple, but very effective...

- ❑ Your title is the most important thing. Make sure your keyword is in your title. For example: **"Great tie dye instructions: 10 easy steps to a successful tie dye project."** You want to have your optimized phrase as close to the beginning of your title as possible.
- ❑ Article length: The ideal article is between 300 and 500 words long.
- ❑ Keyword density - Simply means how many times you use your optimized keyword phrase in your article. I like to use a simple rule of thumb... For every hundred words in my article I include the optimized keyword phrase once or a small amount more. So if I'm writing a 300-500 word article on tie dye instructions. I would use the phrase "tie dye instructions" 3 to 7 times. They do have a percentage to gauge this if you use a keyword density tool. There are plenty of these tools free if you just do a Google search, and your keywords' density should be between 5 and 8 percent.
- ❑ Be sure to include your keyword phrase in the opening paragraph and the closing paragraph a couple of times.

That is basically all I do in the way of SEO. Not hard stuff at all... If by chance you want to learn even more about this topic you could do a Google search like: "search engine optimization" +articles (or article writing).

And usually each article directory site will have some basic guidelines and tips for you to follow that you should check out.

Okay... So SEO check list:

- ❑ Keywords in title
- ❑ 300 to 500 words long
- ❑ 5-8% Keyword density
- ❑ Keywords in opening and closing paragraphs
- ❑ Check out each article directory's guidelines and tips

Okay... so you got your article written and you've got it all optimize and ready to go... The only thing left to do is submit it...

### The Submission Process...

First off, I want to tell you that you should only submit each article you write to one directory. Reason being, you may be penalized by Google for duplicate content.

If you want to submit an article to multiple directories, you may want to change it up a little bit. Try to change your article about 25% overall.

Now let's go over some of the more popular article and ad submission sites:

[www.Ezinearticles.com](http://www.Ezinearticles.com) - This directory has a reputation for only putting the best articles on their site. You cannot blatantly promote a program or it will be considered as spam and will not see the day of light. Also this directory will not allow you to put affiliate links in the body or the author info box. You will have to direct them to your website or a page that redirects them to your affiliate's website.

You might be saying then "what if I don't have a website?"... Well then use sites like blogger.com and wordpress.com and start a blog. There, you now have a website to direct your article readers to without facing penalty from Ezinearticles. Also, both of these website are free to join!

This directory is the most powerful of them all. It has a PR of 6 or 7 (the highest is 10)... EzineArticles will get you listed on the first page of Google with up to 10,000 competing results.

[www.Goarticles.com](http://www.Goarticles.com) - The second most powerful of the directories and a great place for the beginner to start out. Goarticles allows you to link directly to your affiliate's site.

[www.UsFreeAds.com](http://www.UsFreeAds.com) - Another great site for a newbie with no website. Also great for advanced marketers as Google loves UsFreeAds. Most ads when you follow my technique will show up in two weeks.

Instead of writing a whole article, all you will have to do is write a paragraph... which will easily show up on Google's first page. Remember... you have to put your optimized keyword phrase in the title.

The only drawback to UsFreeAds is that it doesn't have the same page rank as Goarticles or Ezinearticles... so you will have to adjust your formula to 1000 or less optimized results on Google.

Additional Tip: Submit your article's url to Google and other website submission directories. This does not help speed up the indexing process a whole lot but it does let Google know that your article is there at least.

A final submission note: When you are submitting, make sure you read that directory's submission guidelines. The main reason for not getting your article shown on these directories is that you have violated their submission terms in one way or another. It doesn't take long to make sure your article is in good shape for final submission.

### Final Thoughts...

I have laid out in detail exactly what you need to do to start earning serious money using article marketing.

One thing I beg of you is to please try this out... So many people just read ebook after ebook and never do anything to actually succeed. Well this is your chance...

There's no guesswork for you. You know exactly what you have to do.

If you can lie aside just a 1 to 2 hours a day (it will get quicker as you go on)... then you can do this. Try to write at least 1 article / day for the next 30 days. At the end of 30 days you will 30 articles out there, some pulling in more money than others do but you will be making money.

Imagine if it averaged out that each article you have written makes you just \$5/day... at the end of 30 days you will be generating \$150 / day, and that's if each article makes you just a measly \$5 / day!

And you can achieve so much more; the sky's the limit...

Remember, I'm am not trying to persuade you to buy something here... I have nada to gain from revealing my secrets to you except the self-gratitude that I've helped at least one person to achieve financial freedom... And it's completely within your reach!

And remember... It is normal for you to be not so good at this at first. With any good thing comes practice. When I first started I wrote crappy articles, and ads, so what!

You will get better... You've got to tell yourself, I'm working towards a goal that's really important in my life and I will not quit.

So... What's it going to be?

Will you close this document, never to think about it again, or will you, starting RIGHT NOW, do something to achieve your goals and aspirations.

I know some people are going to click the big X and go right on with their miserable lives. But there are those few, that small group of people who really want something for themselves. They genuinely want success and they are not afraid of succeeding.

These are the people I would love to hear from. Tell me about your successes and tell me about your failures. Remember any questions or comments you have for me I will be glad to answer.

You can contact me at my help desk system at:

[www.cashlessmarketer.com/askbryan](http://www.cashlessmarketer.com/askbryan)

Here you will be able to send in a ticket with your question(s), and I will be able to reply quickly.

Thank you for taking time to read this special report,

Bryan McConnahea

P.S. - If you know anyone, who could benefit from this free report, tell him or her about it...

Either you can give it away as an incentive for subscribers to your opt-in list, or you can send them to [www.cashlessmarketer.com](http://www.cashlessmarketer.com).

PPS - Earlier I spoke about a marketing program, which has dramatically helped me, in which you may be interested.

The Butterfly Marketing Manuscript is by far the most informational ebook I have ever read, and has taken my

online marketing to a new level. Mike has really gone all out on this one.

The price is \$97, but after reading this, the techniques revealed in this book are easily worth \$400 - \$500.

This is a great read for anyone who is serious about their online marketing business. You can learn more about The Butterfly Marketing Manuscript by going to [www.cashlessmarketer.com/recommends/butterfly-marketing-manuscript.php](http://www.cashlessmarketer.com/recommends/butterfly-marketing-manuscript.php)

I only mention this program because this is a program that I have paid for that has actually helped me earn money online. Whether you choose to purchase The Butterfly Marketing Manual, or not is up to you.

I just wanted to present you with a real review of a great program, and I am not here to steer you wrong.

Again, I hope to hear from you soon! Thanks a lot for reading...

**\*\*\*\*\*IMPORTANT CASHLESS MARKETER REPORT UPDATE\*\*\*\*\***

**12/15/2006**

**“Secure Your One Year Silver Registration to the Most Comprehensive Affiliate Marketers Resource Site For FREE”**

[www.cashlessmarketer.com](http://www.cashlessmarketer.com)

P.S - If you have not been to CashlessMarketer.com and registered, you may want to. I post updates and also there are some cool bonuses you should check out.

P.P.S - There is a special deal at HostGator.com that you should know about. How does your very own top level domain and one-month's worth of hosting with No Contract sound to you? It may sound good but does it sound even better knowing that it's only **one cent**. Crazy, huh? You can find out more about that as a CashlessMarketer.com member, along with lots more. Just go to [www.cashlessmarketer.com/login.php](http://www.cashlessmarketer.com/login.php) then click on where it says register here. It's FREE, of course!

P.P.P.S - Sorry, last thing I promise! There is a very special opportunity to be available to Cashless Marketers ONLY! I guarantee it will knock your socks off when you get wind of this. Be a part of history, and get over <http://www.cashlessmarketer.com/login.php> - then just register. Trust me you don't want to be left in the dark about this!
