The Easy Way To Over $2000 A Month

EARNINGS AND INCOME DISCLAIMER

Contents

Introduction

"Live out of your imagination, not your history."

We simply assume that the way we see things is the way they really are or the way they should be. And our attitudes and behaviors grow out of these assumptions.

The "Inside-Out" approach to personal and self; even more fundamentally, to start with the most inside part of self - with your paradigms, your character, and your motives. The inside-out approach says that private victories precede public victories, that making and keeping promises to ourselves precedes making and keeping promises to others. It says it is futile to put personality ahead of character, to try to improve relationships with others before improving ourselves.

Don't argue for other people's weaknesses. Don't argue for your own. When you make a mistake, admit it, correct it, and learn from it--immediately.

The Easy Way To Over $2000 A Month

Step 1

Right there are 2 ways to do this. Firstly do you have a short report that can be easily disposed off? If yes you can use that If not. There are some other alternatives. Do you have any programs/scripts any thing installable onto a PC? If not make something such as a Windows theme, desktop icon anything that can be installed onto a pc. The more programs you have the better. I advise using programs rather than Windows Themes because they get downloaded more. You can brainstorm an Idea and hire someone to make a botched up version. Its not essential that its fancy and amazing. Even an a video that can be installed onto the machine is great.
Right now get your Report/Windows Theme/Program/Video what ever you have selected.

Side Notes on Step 1 *: Make sure that its in a attractive niche Like Windows theme for sports cars…. A Report on something Like Celeb Gossip or Puppy Care….A Simple Calculator Program or A Program that sorts files anything….Or a video of you surfing the net….a Video of something… .a humorous Flash video..Hell you could have Resell Rights to this Ebook and use this. Or look around google for redistributable software*

Light Bulb Idea on Step 1: *Go to www.download.com or www.softpeidia.com and see what the popular downloads are that aren't in the millions such as Messenger but are in the thousands such as a simple Windows Screen Saver.*

Step 2

Right now you have your report/flash vid/screensaver/program what ever head over to www.snapinstalls.com . I've pre-checked and there is no spyware of anykind. I have gone through 6-10 PPI Programs tested them all over the course of a month and this one by far was the best in terms of customer support and prompt payments. You can see it has a nice friendly not over done GUI.

<u>**There Programs**</u>

Upload Our Program Into Your Content

SOFTWARE BUNDLE: This solution works well with content publishers, software developers, publishers, distributors and web-masters who already promote a software program. By using our software bundle you can instantly combine your offer with ours, or swap in ours for yours depending on how you would like to offer it. Keep in mind you need to make sure you follow our Publisher Distribution Agreement, and follow our Code of Conduct Agreement when offering our package to your user-base! If the user installs the software bundle, then you get the credit, it shows up in your SnapInstalls reporting, and you get PAID!

Sign Up Now!

Simply Refer to SnapInstalls

REFERRALS: Referrals are one of easiest ways to generate revenue and make money by simply placing a banner, or creative or link to our site. If the referral link signups a distributor, publisher, web-master, or site owner - you get credit, its shows up in your SnapInstalls reporting and you'll earn a 10% referral fee of the revenues produced by the signing up party - MAKING MONEY COULDN'T BE EASIER!

Now we choose the Software Bundle. Basically to summarize you combine what ever you have previously chosen with there software bundle and you get paid simple eh?

You've probably taken a peak at the rates $0.30 per install. If you think about it lets say you have 2 Flash animations for illustrations sake. You've promoted them (explained later) To 50 Sites. Each one has received 30 downloads. That's 60 downloads on 50 sites meaning 30'000 downloads x 0.30 = $900. We all know that programs and various animations have well over 1000 downloads. If your doing a screen saver or animation why not upload to youtube? Then ask people to download to view the rest of the animation or screen saver? I must admit I have used adult themed screensavers and Hired people to do adult themed animations. Written up Adult themed reports. All have excelled beyond the regular. While people may have different ethics and morals to me. I see no harm in making money and providing people what they want aslong as it is not harming the other person.

Step 3
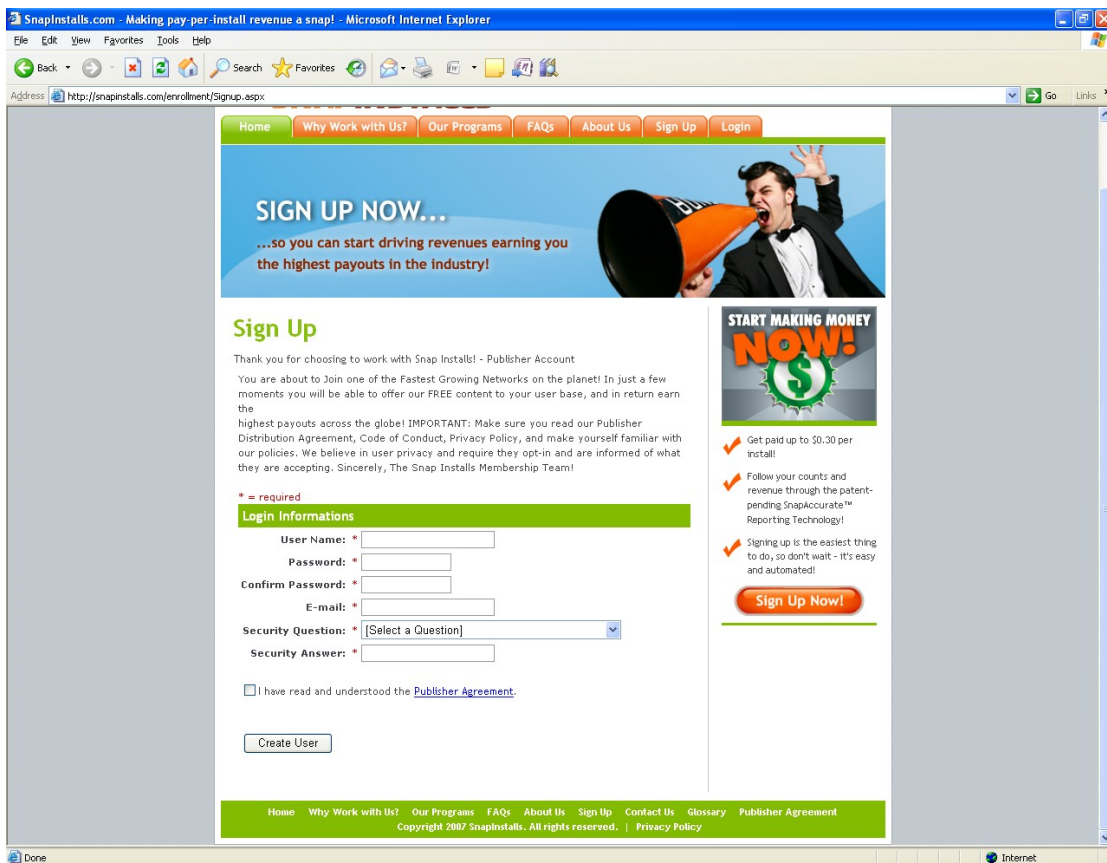

Simple friendly sign up page. After this page you will recive a slightly longer one asking for more details. Although none are too private such as credit card details or details about your business other than Name. Nice and simple. Now you have signed up you should wait a little while until your account is activated. This usually takes 2-3 hours depending on time of day.

Step 4

Right this is the fun part **promotion** you want to get as many people to download what ever you have created. I advise you sit down for an hour or so and do this. From then it may take 30 mins a week to replenish your supply of downloads. Now I have numerous ways to do this as follows. You will also need to create PAD Files (There the files you see on Download.Com before you download a piece of software programs for this are widely avaible and are usually freeware Also you need to bundle your created product with theres using simple free programs. Right back to the promotion

Suitable Programs

PromoSoft by DeveLAB
PromoSoft is an easy to use, professional software promotional tool, which automates the process of promoting your programs on the Internet. It can automatically submit your software to hundreds of software sites and archives within minutes. Daily updated site list guarantees the highest submission quality all the time. PromoSoft can also collect the valuable information about submitted software such as listed version and number of downloads.

Aid Submission Genius by AidSoft
Submit your software to 300 software sites using new submission principle - an online submission robot, the most accurate and effective submission system. All you need to do is to fill one form or enter your PAD URL, all the rest will be done automatically. Also, the program will take care of your author accounts and will choose right category for each site automatically. Unregistered version includes full features set and allows to do full test.

Creating PAD Files ➔ www.webpronews.com/expertarticles/2006/06/13/creating-a-**pad**-file-to-**promote**-shareware

Also head over to download.com and try the search terms "Software Submitter" or "Promote Software" – Submit away and your done. Your system to collect $.30 is set up and in place.

Useful Extracts.

"Submit your software/shareware for review and inclusion to the numerous DOWNLOAD websites and PORTALS. These websites are visited by Tens of Thousands of visitors daily that are searching for software for their use. Many of these sites do charge a small fee for inclusion. The reward is that your product will be listed with many others for users to choose from. Software developers gain most of their recognition from these sites as users continue to see their product listed amongst others of a similar nature. The vast amount of "downloads" of your product via these sites will expose your product to the most amount of people. You can save lots of time by using one of the specialized Software Submission Services that will submit for you. Think of it as a numbers game; the more people that see and use your product the more likely they will purchase your product. There is no guarantee that everyone who downloads your product will purchase a license to continue using it. In fact, there exists a large number of people who are refered to as "shareware junkies", within the software industry. These are people who enjoy downloading and trying (not buying) a numerous amounts of software for the mere pleasure of trying something new.

Many developers belong to one or more discussion groups and open forums online. Many times people when doing a Search will be directed to one of those. But after reading a posting and gaining an interest for some product that is in the discussion - the user is left with nowhere to go. Because the writer: JBCool did not use their real name, not mention their website or have a URL for anyone else to go to. Common sense and good marketing practice tell us to advertise whenever and wherever possible - think of it free advertising.

Another key to being professional: Always use a signature on every email you send stating your website, the URL and possibly a tag line or slogan. Do not over do it - Keep it simple.

Having more than one product opens your website to multiple inquiries and possibilities. We do not know of any developer that has only one project on the bench at any given time. Release your other products as they become useable and let an army of users tell you what needs to be fixed. You can release them as Beta software or as freeware at no cost to the user with the requirement that they not hold you responsible for any errors. Provide an incentive for users to give you feedback; offer a free copy of the software after the bugs are worked out. In most cases, somewhere between Version 1 - 2, your product will begin to resemble something really useful and that is the time to set a small fee for your software. Having a few products that you will continue to develop as time goes on will not only gain more sales but also keep you busy bouncing back and forth between projects"

Want More Ideas To Make Money?

Need more ideas like this to make money online? This eBook came from www.imresellrights.com where you can find many more ideas about how to make money online.

Extra Ideas.

- If your creating an Animation/Video Use Youtube and Ask people to download the full version.

- If your creating a report Circle it around to a few friends and ask them to pass it along also offering it to your list or a popluar forum.

- If your using redistributable Software upload onto a host and then post the link onto relevant niches. Although be careful and read the TOS of the Software.

- If your creating screen savers submit to multiple Directories.

- Also you could enter chat rooms into relevant niches and let people know about it.

- You could Upload onto File Sharing Programs such as Limewire,edonkey ect

- Upload onto Torrent Sites such as Torrentz.Torrent Reactor.Priate Bay ect

- Use the PAD (Product Description File) And use it as an Article at your favorite sites such as Ezine Articles ect Then hook up a link to the download page.

- Now this is not mandatory but If you have a good Product Description then why not spend a little adsense to the download page? Lets say .05 cents a click on a Decent niche and the Download rate will be high due to it being freeware.

- Hell you could go as far as launching a few press releases.

- Yahoo answers to solve someone's search for your freeware....hehehe
