Online Roulette

Quick guide on how to make \$144 (£80) within 30 minutes.

Many online casino and poker websites offer 1st Deposit bonuses. This is given as an incentive for you to make a deposit and then spend money on their website. There is one flaw with most of these as you are required to bet a certain amount to receive this extra money. The next few lines will explain how to use this to your advantage and cash out your bonus without risking any of your own money!

By clicking on this link, you will get a 100% bonus of up to \$200 when you make your first deposit. Therefore if you deposit \$200, you will receive a \$200 bonus which is immediately credited to your account for your gambling pleasure.

This bonus can only be withdrawn as cash into your bank account once you have staked 10x your bonus which in the case of a \$200 bonus, would be \$2000.

This seems like a lot of money. This casino also doesn't count bets on red or black towards the 10x stake so therefore I had to think of an alternative way to cash out this bonus without risking my own money. They do however count bets on all the numbers (0-36) in the 10x stake.

Therefore by betting \$3 on each number you are betting $37 \times \$3 = \111 each time and losing \$3 as each time you are winning $36 \times \$3$ back.

If we do this 19 times we will have staked \$2000 and only lost $19 \times \$3 = \57 of our deposit. Therefore leaving us with \$143 of our bonus intact! (there is a button called repeat bet which you can keep pressing, therefore you don't have to do each bet from 1 to 36 and 0 individually time and time again!).

So by depositing \$200 and playing 19 spins in the way I have described above, you will walk away with \$343, which is greater than \$140 profit for less than 30 minutes work!

“HOW TO MAKE OVER \$200 A DAY PLAYING ONLINE ROULETTE”

First of all, let me congratulate you. You're now one step closer to earning over \$200 a day. You are about to become what is known in the casino industry as an 'advantage player'. This step-by-step guide will give you the advantage by guiding you through the process of winning and earning a steady, predictable income, hour after hour from on-line roulette.

This system can be used to generate profits again and again. We have refined this system over many years and have made a lot of money from it. We teach you the system and share all of our secrets with you including the best casino to use and the best times to play.

You are guaranteed to be a winner as you will never bet with your own money! This is achieved by taking full advantage of the excellent bonuses that's offered to new players. You will be playing with the casino's money – not your own – so you've got nothing to lose.

Now, before we go any further, it's important that you read through ALL of this e-book so that you can get a clear picture of how the whole thing works.

Having said that, you have to follow the instructions that I provide. Period. This system only works when you do as I outline. If you do not, the positive results on offer cannot be guaranteed. The mindset of a professional gambler is one of strict discipline, please keep this in mind as you are following these instructions.

NOW, LET'S GET STARTED

Firstly, we have tried and tested numerous on-line Casinos, and have found that this system works best at [this casino](#). Therefore, we seriously recommend that this is where you use this system. **Citizens from the U.S please [click here](#) for usa friendly casino sites.**

[Click Here - To Download The Free Casino Software](#)

Remember to download the CASINO and not the poker (download the right option otherwise this won't work).

This casino is recognized as one of the Internet's best casinos for on-line gaming. They are the biggest, most prestigious and the fairest on-line casino out there. They've won many awards, is a leader in the industry and is a respected global company.

Please be sure to only download the software via the links provided as we are constantly updating them to take you to the best offer the casino has. These promotions are not always displayed on the casino's homepage so you will not get the maximum amount of free cash available if you do not follow the links provided.

Downloading The System

Now I know most of you will know how to download the casino software for themselves as it is pretty straightforward but not everyone is a computer whiz so for those of you that are new to computers below are full instructions on how to download the casino software. If you know how to do this for yourself then simply skip this section. However, I do suggest you just read along anyway just to make sure you've done everything correctly.

1. If you haven't done so already, click the link below (marked 'Click Here') to go to the casino now:

[Click Here](#)

(Click the link above to go to the Casino)

ATTENTION: THIS BUTTON OPENS A NEW WINDOW - MAKE SURE YOUR POP-UP STOPPER DOESN'T PREVENT IT FROM OPENING.

Once there, click on the Download link near the top of the page. Follow the on-screen instructions to download the casino installation file onto your desktop (or location of your choice)

2. Run the installation by double-clicking the new 'installcasino' icon on your Desktop (or wherever you saved it)

3. A screen with appear asking you to confirm where you want to install the software. Click on 'Next' to continue to install the software.

4. Next, after it's installed a screen will appear asking to choose your game, Choose 'Money Play'. (if the software was not automatically launched then double click the casino icon on your desktop to launch the software).

5. Next, click on 'New User! Sign Up Here!'.

6. Next, fill out your address details and click on 'Submit Registration'.

7. Next, login by clicking on the 'Login' button.

Signing Up & Getting Your Free Money

Now that you have installed the software, you now need to open an account and make a deposit. **IMPORTANT:** This Casino offer's a 100% bonus so **MAKE THE MOST OF IT** as you only get one chance to do this.

Since we need \$200 (£107) for the system to work, a good deposit amount is at least \$200 (£107). The casino will then match your deposit 100% dollar-for-dollar (pound-for-pound) by adding an identical amount of THEIR money to your account giving your account a total of \$400 (\$200 of your money + \$200 of Bonus money) .

You can then **IMMEDIATELY WITHDRAW** your deposit while leaving the Bonus money in your account. This way you can get up to \$200 for nothing. There is absolutely **NO RISK** involved, because you have paid nothing to start!

For the best results, it is a good idea to leave your initial deposit in your casino account. This is what is referred to as 'Sitting money', which is money that you deposit to get the bonus money but don't actually use to play with. Since you will be only using the casino's money, not your own, the sitting money is never in danger of being lost.

As all experienced pros are aware, Casino accounts with sitting money in them are looked upon more favourably by the casino's system.

Just remember to stay disciplined and **NEVER** use the sitting money to play with. After a few days of using this system, you will have made more than enough money to withdraw while still leaving some sitting money in your account. Then you will continue to use this system to make even more money steadily and repeatedly each and every day.

Although it's not required, this is the 100% risk free method that we use and recommend to guarantee the best results.

So, join up and login as per the instructions above. Then, click on the Casino link on your desktop or in your Start menu, to get started...

1. First, click on 'CASHIER' at the bottom of the screen.

2. Next, click on 'DEPOSIT'.

3. Fill out your details to make your deposit. *Note: This is completely secure. This is the the leading and most reputable casino on the Internet so the transaction is completely safe and secure. BE SURE TO DEPOSIT THE FULL \$200 to take full advantage of the 100% Matched Bonus, you only get ONE chance to do this.

4. Your deposit will be added to your account. You will then have a total of \$400 or double whatever you deposited to a maximum of a \$200 bonus as the casino will match your deposit.

Now It's Time To Make Some Money!

Now that you have your account open and you have at least \$200 in it. Please follow the instructions below. You must NOT deviate from these instructions. Any deviation, whether big or small, can end in disaster. Therefore, it is very important that you read and follow the instructions carefully and do exactly as I outline. It will not take long to digest.

Before you are introduced to this system, we would like to provide you with some information that will help to build a clearer picture of what we are trying to achieve.

Not many people out there can win at roulette successfully. The reason for this is because the house edge is almost impossible to beat in a random scenario. You see, the odds at the roulette table are based on the "Law of Averages," minus one or two points. That way, when you're playing the table, the casino always has the odds on its side. This system works the law of averages and uses them to your advantage.

You may be thinking 'surely the casino will realize'. This is a perfectly rational thought when applied to traditional casinos, however, on-line there are literally millions of people playing, all over the world! If you consider the amount of people who are using this system to exploit this flaw you will be something like one in three million.

The System

The way this system works is that you lay bets on the Low / Middle / High rows of the roulette table. All you need to do in order to win is bet on the same one, with only a slight raise in stake each time until it wins. This may sound risky, but the bets and odds have been calculated for you to ensure that you are a winner every time, couple this with the fact that all we are betting is free money and you simply can't lose!

Now, these fields have a 1 in 3 chance of winning according to the "Law of Averages," and they pay a return of 2 to 1. So if you follow this system, you only need 1 in 14 in order to be a winner

(Depending on your balance). Doing this means that you've quadrupled the "Law of Averages" and you've given yourself an incredible advantage!

Another factor working in your favour is the casino software, which was programmed to rarely pick numbers from the same section of the table more than a few times in row. The intent of the developers was to avoid situations that might cause players to doubt the randomness of the game. By making sure that the game appeared random, however, the developers inadvertently built in an exploitable flaw that could allow an observant player to easily win.

And the beauty is that it's so simple!

THE BASICS

If you've never played roulette before, you need to understand what Low / Middle / High bets are.

The picture below is an example of a "Low" bet. If any number between 1 and 12 comes in, you win.

Now let's take a look at a bet on "Middle." If any number from 13 through 24 comes in, you win.

And lastly, let's take a look at a "High" bet. If any number from 25 through 36 comes in, you win.

Now, let's begin:

Click on the Roulette link to start playing. Next, click on 'Private Table' and then 'Standard' (min \$1 bet max \$300).

You will see the roulette table on your screen. You can spin the wheel as much as you like, even without betting (try it and see).

Notice how the winning number is indicated by a peg each time. You need to keep an eye on this peg.

Here's how you use your free \$200 to make even more money - follow this system EXACTLY.

As you can see the roulette table can be divided up into the first 12 numbers, second 12 numbers and the third 12 numbers. We will call these 1, 2 and 3 respectively for ease of use of this system.

You will be placing bets on one of these sets of 12 numbers. The odds on this are 2:1, so when we bet \$1 we get \$2 in winnings and our original \$1 back.

Let's start off with a simple pen and paper project. Now, what you're going to do is every time you spin the wheel, you'll record whether a Low (1), Middle (2) or High (3) drops in by writing down 1 if the winning number is in the first 12 numbers, 2 if the winning number is in the second 12 and 3 if the winning number is in the third 12 numbers.

Click to spin again, at the moment you are still not placing any bets.

When this spin ends record the in the form explained above. Say it was 26, this is in the third 12 numbers so we would write down 3. Now continue to do this, be sure to make a note of each number that drops in.

Let's say that you're at a table and 03, 11, 36, 16, 22, 26, 03, 34, 14, and 17 drop in.

You'll write down: **1 1 3 2 2 3 1 3 2 2**

Easy, right?

What you're doing is waiting for 5 spins of the wheel where one of the sections of number has not come up. Once there has been 5 spins without one of the groups coming up, you start betting.

Let's say you spin the numbers **05, 10, 09, 15, 21**.

You would write down:

1 1 1 2 2

That means that 3 (the third set of 12 numbers) hasn't dropped in for 5 consecutive spins. It's time to start betting.

Patience is paramount here - a run of 5 spins without one of the groups coming up will happen, just keep spinning the wheel without placing any bets until it does.

How To Bet

On the bottom left part of the screen you'll see your chips - \$200 worth of them. There will be a gold heart by the pile of \$1 chips. Make sure that the gold heart is next to the \$1 chips before starting to bet. Click on the left of the row you want to bet on. Your \$1 chip will appear in this position (if you misplace it, right-click it to move it back to your bank).

So when we have 5 spins without one of the groups coming up we bet \$1 on the group that has not come up.

So, in the example given you would bet \$1 on HIGH. Spin the wheel.

So, what you're going to do is place \$1 on HIGH -- so if any number between 25 and 36 drops in, you win. You will win \$3 and be in profit \$2, now start the process again. Remember to include the winning number in your sequence of results.

If it doesn't land in HIGH, don't worry. Place a \$2 bet on High again -- and if it drops in, you win \$6 (which means you've made \$3 in profit).

Now if you still don't win, keep on betting using the staking plan below until you win.

Bet Number	Stake to Bet	Winnings	Profit
1	\$1	\$3	\$2
2	\$2	\$6	\$3
3	\$3	\$9	\$2
4	\$4	\$12	\$2
5	\$6	\$18	\$2
6	\$9	\$27	\$2
7	\$13	\$39	\$1
8	\$20	\$60	\$2
9	\$30	\$90	\$2
10	\$45	\$135	\$1
11	\$67	\$201	\$1

By doing this and sticking to the system above, you will never lose when your number drops in!

YOU MUST BE PRECISE, THOUGH!

When your number finally drops in, it's time to stop betting and beginning over by finding the sequence where either a low, middle, or high doesn't appear for 5 consecutive spins.

I would suggest you write this list of numbers on the sheet of paper you are recording this list of groups of numbers that come up.

IMPORTANT: As soon as you win, you go back to \$1 bets. Always keep a note of which group of numbers has not come up and when it gets to 5 spins, start betting.

WARNING - BE CAREFUL: When you win, you must stop betting, HOWEVER, the casino wants you to go on betting, so as soon as you win, it changes the 'Spin' button to a 'Repeat Bet' button. To counter this, just click anywhere on the board to place a \$1 bet, and then IMMEDIATELY 'RIGHT-CLICK' this chip to remove it again to your bank pile. You will now be able to spin again without betting.

Easy? Yes, but IT WORKS!

Now, you're probably thinking that the gains don't appear to be huge but the fact is that if you use this system, you will make a steady profit, hour by hour. There is a huge potential here if you just stick with the system. Believe me -- I should know. I've been using the system every day.

When you start off, you're not going to be making \$300 a day, obviously. What I want you to shoot for is to make \$80 to \$90. You should be able to do that in 60 to 90 minutes. This causes your bankroll to build up to the point where you can start putting more money down.

Final pointers – To help you along the way.

Here are some helpful pointers that I've learned along the way. Since I'm not a computer programmer, I can't explain why these things happen, only that they do.

1. Try not to spend more than 15-20 minutes at each table. I don't know why but after this amount of time, every table seems to get harder to play.
2. Switch casinos every 30-45 minutes, this greatly increases your winnings. We get great results doing this. Simply follow the same guidelines as above and you'll increase your profits even more. We have found **Party Casino** to be the next best casino for this system. By taking advantage of their bonus offers as well, you can use the bonus money to get started so you don't risk any of your own money. To Take Advantage Of **Party Casino** Bonus Offer Just Use The Bonus Code : WINPC3 While Registering As a Real Money Player.
3. Always use a private table so you can spin the roulette wheel when you want to.
4. If you have been at a table for longer than 5 minutes and zero comes up when you are not betting, switch tables. If you are betting, just carry on with the system as normal until you win, then switch tables.
5. Don't play about 2 PM and 3 PM. I don't know why but the casinos seem harder to play during this particular hour.
6. Keep the money in your casino account until you have over \$500 then withdraw \$200 so always leaving at least \$300+ in your account.
7. Remember that you don't want to get greedy. This is where most players make their worst mistakes. What you need to do is set yourself a target amount stick to it. When you reach it, walk away and come back tomorrow.
8. You can only bet what you can afford to lose. That's common sense but you'd be amazed at how many people don't take this advice!
9. Maintain your discipline! This is the most important rule there is! Stick to the system and do not deviate!

Good luck and have fun!

P.S. - Still not sure? Well, think of it like this - what do you have to lose? By following these instructions EXACTLY, you are GUARANTEED to have \$200 to play with, without spending a penny of your own money! What's the worst that can happen? You spend two hours playing a game with someone else's money? You have absolutely NOTHING to lose, if you haven't already done so, [click here](#) to download the free casino software to play on-line roulette and give the system a try...you'll be glad you did!
