## Introduction

I have been making money online for about 3 years now and must admit it was very tough and confusing to begin with. After a lot of trial and error combined with some help from internet earning "veterans" I can now earn a full time income working online. In fact there are thousands of people who do, and many are regular people like you and me with no IT qualifications or advanced computer skills.

It is a fact that making money online is easy and requires no great skills... when you know how!

## Quick Start – your 3 page 8 step guide

Write all your passwords in a notebook or blank sheet(s) of paper and keep in a safe place. For convenience use [firefox](#) to remember your passwords, also [firefox](#)'s tab feature is extremely useful when opening multiple websites.

1. Use safer and more convenient web browser - [firefox](#).
2. Join [paypal](#) if you haven't already. Later you may need to join [e-gold](#), [uniclear](#), and [alertpay](#).
3. Make sure your computer is protected with internet security tools, for example - Norton Internet Security.

Here is some of the best **free** security software...

-  anti-virus ([AVG Free Edition](#))
-  [House Call](#) offers a free online anti-virus scan
-  anti-spyware ([Spybot](#) , [ad-aware](#), [spyware doctor](#))
-  firewall ([windows firewall](#) or [zone alarm](#) or [Filseclab Personal Firewall](#))
-  [Windows updates](#)

4. Join two affiliate programs – [Clickbank](#) and at least one good online casino (such as [casino rewards](#), [Bingo program](#), or [poker](#)) to promote them for referral commissions.
5. Spend at least one hour each day earning from the paid program sites below. Don't pay any money until you have earned some first! Join at least 10 programs, these pay you to take surveys, click member ads, join sign-ups, sample products, complete free offers, and more...

-  [Treasure trooper](#)
-  [Donkey mails](#)
-  [Send earnings](#)
-  [Leap cash](#)
-  [Profound hits](#)
-  [Cash crate](#)
-  [Earn by a click](#)

-  [Clicks matrix](#)
-  [Eprofit team](#)
-  [Phoenix surf](#)
-  [Pay day surfer](#)
-  [Compact surfing](#)
-  [Wired surf](#)
-  [Alien trust](#)

6. Spend at least one hour each day manually surfing to promote your favourite affiliate.

Join at least 10 of the manual surfing traffic exchange sites below. Only join the 4 auto surf websites if you are confident with your internet security – they are a great source of free visitors. Spyware scan your computer every day and don't worry if you get some spyware, your computer will still be safe with a good firewall and anti-virus software.

You could also sell the traffic earned from these sites and make more money. You can buy and sell manual surf traffic anywhere from \$1 - \$10 per thousand visitors.

## MANUAL SURFS

-  [Click voyager](#) – buy and sell credits between members.

-  [Breed traffic](#)
-  [Free million auto surf](#)

## **BLOG TRAFFIC**

-  [Blog clicker](#)
-  [Blog explosion](#)

7. A great way of promoting your affiliate and referral links is by placing them in the signature of your forum posts. By searching through the forums and making posts here and there you will learn a lot and make even more money.

Here are my top 4 favourite forums...

-  [Money maker group](#)
-  [Talk gold](#)
-  [Warrior forum](#)
-  [Get paid forum](#)

8. The final step is to visit [www.earnsmart.info](http://www.earnsmart.info), [www.10ways.net](http://www.10ways.net), [www.10skills.com](http://www.10skills.com), and [my eBay store](#) for more ideas and opportunities. For every program you join as my active down line you will receive \$1 free credit in [my eBay store](#) – in total that's equals over \$30 in store credit!

information in more detail...**

## Stay organised

To make your internet earning life a lot easier and more efficient you should organise all of your links from this ebook into different folders. We also highly recommend you use [firefox](#) if you don't already.

[download firefox here](#)

Now make 6 new folders in your bookmarks (go to Bookmarks menu, Manage bookmarks...)

## Payment processors

Join [paypal](#) if you haven't already.  
Later you may need to join [e-gold](#) and [alertpay](#).

Payment processors allow you to send and receive money online without giving people your personal or credit card details directly.

### Stay safe

Make sure you create unique passwords that include both numbers and letters. Write all your passwords in a notebook or blank sheet(s) of paper and keep in a safe place. For convenience use [firefox](#) to remember your passwords, also [firefox](#)'s tab feature is extremely useful when opening multiple websites.

### Important Warning

You may receive an email which appears to be from one of your payment processors. However the legitimate looking email could really be from some scam artist wanting your username and password. This is called [phishing](#), and is unfortunately becoming more and more common.

There are various things you can do to help protect yourself against [phishing](#) scams...

- ✚ Never click the payment processor link inside the email – type the real address into your [web browser](#).
- ✚ When logging into payment processors the address should always start with https
- ✚ Make sure you follow the advice in the internet security chapter of this book
- ✚ Click on the following links for more information on [phishing](#) and [internet security](#)

## Paypal

[paypal](#)

Simply put [paypal](#) is the number one payment processor in the world. They are owned by eBay and are very well trusted. If you haven't already signed up with them you should do so now.

[More information here](#)

## **Egold**

[e-gold](#)

A lot of sites use [e-gold](#) for various reasons. Some people complain that it's inconvenient to fund your [e-gold account](#). I have found the best [e-gold exchanger](#) at the moment is [uniclear](#).

[More information here](#)

## **Alertpay**

[alertpay](#)

More sites are using [alertpay](#) now, so it should be included. It is recommended you join the [alertpay](#) secured account.

## Internet Security

Make sure your computer is protected with internet security tools, for example - Norton Internet Security.

Here is some of the best **free** security software...

-  anti-virus ([AVG Free Edition](#))
-  [House Call](#) offers a free online anti-virus scan
-  anti-spyware ([Spybot](#) , [ad-aware](#), [spyware doctor](#))
-  firewall ([windows firewall](#) or [zone alarm](#) or [Filseclab Personal Firewall](#))
-  use safer web browser ([firefox](#))
-  [Windows updates](#)

With the increasing threat of viruses, identity fraud, phishing, spyware, and key loggers, it has never been more important to protect the valuable contents of your home computer. It is vital that you have good [anti-virus](#), [anti-spyware](#), and [firewall](#) software installed on your computer. Also you should use [firefox](#) and keep up to date with the [Windows updates](#).

Before you get too worried just know that even though there are a lot of threats out there, free tools are easily available to ensure we don't suffer any damage.

You can gain more information on the following subject by clicking on them...

-  [Computer virus](#)
-  [Identity fraud](#)
-  [Phising](#)
-  [Spyware](#)
-  [Key logger](#)
-  [Trojan horse](#)

## Get paid programs that really work

All of these sites are free to join. I'm a firm believer in not making people pay money to start earning. Maybe once you have made some profit you could use that money to upgrade your favourite program and fast track your earnings.

**Be wary of any programs that promise you a ROI %** (return on investment - e.g. 144% return per month). Don't put very much money, **if any**, into these programs as they are highly risky and most likely ponzi schemes. These are often referred to as high yield investment programs ([click here for more information on hyip](#)).

Try to concentrate on the programs where you can easily see where the money is coming from to pay you, and where you don't have to pay any money to join. Most sites offer excellent upgrade packages, and I recommend you join some after reviewing which programs work best for you.

## Affiliate products to promote

You should find at least 3 or 4 affiliate products that you think will be successful – usually the ones that catch your eye. If you can get 2 people to buy the product and/or signup from your link each day, then you are looking at around \$1200US per month extra income.

## The best information product affiliate program

[Clickbank](#) is free and easy to join – you should do it now...

Thousands can be made from joining [Clickbank](#) and promoting other people's info products. Most sites offer 50%-75% commission, so you can earn \$20+ each sale.

### Sounds easy?

Well it's not. The hard part is choosing the right product so people will actually spend their hard earned cash, thus providing you with a commission. Once you have mastered that skill you will easily be able to quit your day job with a comfortable income coming in.

## How to make money with online casinos without having to play

Loads of cash can be earned by referring people to online casinos. They make it easy for you by offering the potential punter bonuses for signing up. There are various commission options available so you can choose which one is best for you. Basically they will give you a percentage of the profits from the people you refer.

## Free website traffic

If you have a website with google adsense or similar ppc advertising then never include these as your auto or manual surfing sites, unless you want Google to disable your account. Google says to be extremely careful with adsense and traffic exchange programs.

Make sure you login and surf for at least one hour per week. You should surf multiple sites at the same time. Remember to actually look at the sites that are displayed because if you pay attention you will find some diamonds in the rough and gain some excellent ideas for your own campaigns.
